About Me

Creative Full Stack Developer driven to craft compelling products that resonate with users. Passionate about blending frontend finesse with backend robustness to deliver innovative solutions. Seeking opportunities to apply my skills and vision in a dynamic team environment.

Papers & Projects

SUSTAINABLE DEVELOPMENT WITH AI-POWERED BOT

Created a Python-based Telegram bot using MySQL to manage citizen-reported issues like road conditions and power outages, enhancing civic engagement and quick response. Presented project as both paper and practical application.

E-BUSINESS

Delivered a paper on the evolution of electronic business, highlighting its pervasive influence in today's world. Through extensive research, uncovered the profound transformations shaping the modern business landscape, laying the groundwork for the creation of a new brand.

CRYPTOCURRENCIES AND FINANCIAL INCLUSION: OPPORTUNITIES & RISKS

The paper explores how cryptocurrencies can foster financial inclusion by extending access to financial services. It assesses the benefits they offer, such as reduced transaction costs and increased accessibility. Additionally, it examines the risks associated with cryptocurrency adoption, including regulatory uncertainty and security concerns, providing insights into the evolving landscape of digital currencies and their impact.
